Monthly Newsletter

## DECEMBER IS HIV AWARENESS MONTH

- Over decades, HIV slowly spread across Africa and later into other parts of the world. The virus has existed in the United States since at least the mid to late 1970s.
- HIV (human immunodeficiency virus) is a virus that attacks the body's immune system. If HIV is not treated, it can lead to AIDS (acquired immunodeficiency syndrome).
- There is currently no effective cure. Once people get HIV, they have it for life.
- But with proper medical care, HIV can be controlled. People with HIV who get effective HIV treatment can live long, healthy lives and protect their partners.

## Did You Know?

If you find a plan that is offering low copays and a monthly fee, make sure it is actually providing coverage in the event of anything! Ex. heart attack, stroke, etc.

## Upcoming Events:

November 1 - December 18

Toy & Coat Drive
